

Bridge Street Widening Consultant Presentation October 6, 2020

Presentation By:
Diana Langley, Interim City Manager/Public Works Director

Background

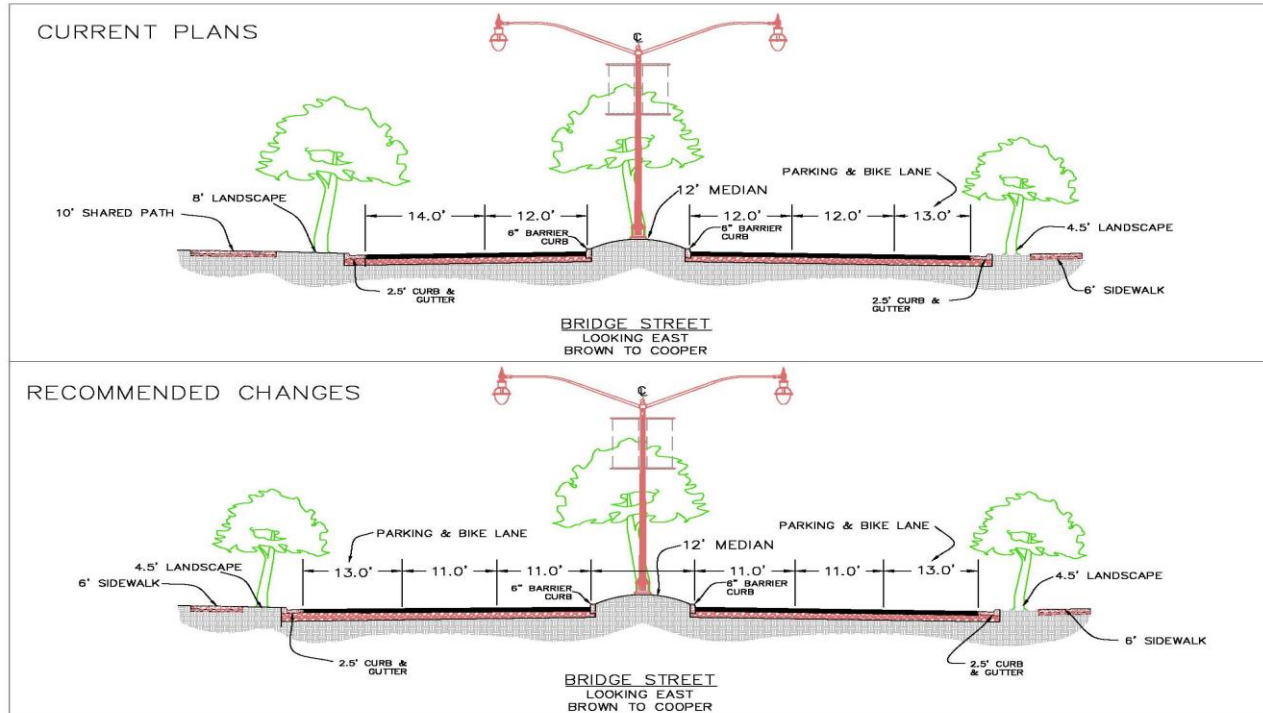

- The Bridge Street Widening Project between Gray Avenue and Cooper Avenue is currently designed to provide a four-lane alternate to State Route 20 that facilitates a large volume of traffic between State Route 99 and State Route 70.
- City staff has been working with Civilis Consultants to analyze the Bridge Street Corridor and identify potential infill development alternatives between Gray Avenue and Cooper Avenue.

Consultant Presentation

- Michele Reeves with Civilis Consultants will now present her report.
- Following Michele's presentation, staff is recommending discussion and direction from Council on potential design modifications.

Discussion

Discussion (cont.)

Design	Pros	Cons
Current	<ul style="list-style-type: none">• Higher design capacity at intersections• Lane widths match adjacent sections	<ul style="list-style-type: none">• Likely higher speeds• No on-street parking on north side• Potential shared path conflicts
Recommended	<ul style="list-style-type: none">• Likely lower speeds• On-street parking on north side• No shared path conflicts	<ul style="list-style-type: none">• Lower design capacity at intersections• Narrower lane width than adjacent sections
